

# Case Study

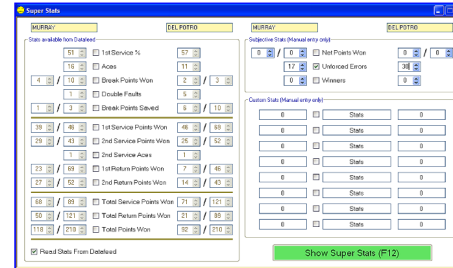

CBC Sports - Rogers Cup 2009

**Customer:** CBC Sports - Rogers Cup 2009  
**Application:** BLScoreBug Tennis with SuperStats™  
**Platform:** Harris RTX G3

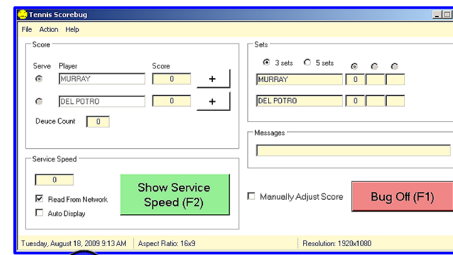

CBC Sports required a real-time Tennis ScoreBug display solution for their coverage of the 2009 Rogers Cup tournament.

- Intuitive ScoreBug user interface to manage games, matches, sets, points and tie-breaks.
- Preferences to choose 3 set or 5 set matches.
- Solution automatically counts and displays number of deuces in a game.
- Settings to change match point to championship point.
- Socket connection to display service speed via TCP/IP.
- Hotkeys to show Bug, Service Speed and Game Statistics.
- Superstats interface provides a selectable list of game statistics via TCP/IP and form for entering data manually.
- Tennis ScoreBug with SuperStats supports HD or SD output.
