

New! Graphics Productivity Bundle

This feature-packed system is especially suited to live operations.

It is easily quoted and ordered using this single part number : **INSG1PRODBDL**

INSCRIBER G1 SD Productivity Bundle

- Inscriber G1 SD system, single channel (INSG13100)
- With Automation Interface (Intelligent Interface) and Media Store
- Clips, Active Textures, Media Objects option (INSG1CL)
- RTXports™ option (INSRTXP)
- Direct Control™ option (INSDC)
- Inscriber Paint option (INSPNT)
- RapidFire Keyboard (INSRFK)
- Three days on-site training, per site (INSG-OPS-OTR)

Note: Customer pays only travel expenses, billed separately.

The bundle price is **\$31,995 USD*** — a savings of over **\$16,000 !**

In addition to attractive pricing, this package offers key advantages.

First, the RTXports option enables third-party software like school closings tickers, sports scores and more to run **concurrently** on the Inscriber G3 without having to use a separate unit

Secondly, Direct Control is network management software which offers an innovative way of managing your graphics resources across a LAN. Resources on the G1 system can be viewed and managed from any computer system on the LAN. This streamlined user interface allows for editing, displaying, or simple browsing of CG graphics, playlists, news rundowns, templates or template libraries even by those not trained as CG operators.

In addition, the newly introduced RapidFire keyboard enables instant recall of messages and easy access to Media Store and other functions. This keyboard is ideal for live production and has been designed with news, sports and other live events in mind. And by adding the MOS option to this bundle, it is an ideal solution for newsrooms working in the MOS environment.
