

# Omnivex® TickerDisplay

## Content Management Software

### Design

Combine customized messages with external stock data for display on your tickerboard. Fully format your text by indicating the font, size and style. Include date, time, pictures, text, foreign symbols and additional data such as indices and news headlines.

### Format quote appearance

Use predefined templates to configure the appearance of your quote data. Filter quotes based on volume. Use the automatic stock quote formatting or use data vendor formatting.

### Customize your data sources

Includes interfaces to all major data vendors. Quickly and easily add support for your other DDE data sources. Built-in support for Excel spreadsheets.

### Customize your data

Define multiple data feeds. Sort data by any field to indicate the order in which you want items to appear on your ticker. Schedule "top ten" type lists for supported vendors. Automatically change font color based on values.

### Schedule

Powerful scheduling capabilities, easy to use graphical interface in a familiar calendar format. Insert spot messages to interrupt regular programming.

### Deliver

Define and simultaneously drive multiple boards and board types.

Omnivex TickerDisplay 4 gives you complete freedom to design the information shown on your ticker, regardless of the complexity of your requirements. All available hardware functionality from major hardware vendors is supported within Omnivex TickerDisplay 4.

Omnivex TickerDisplay 4 allows you to create a ticker feed with real-time or delayed data. You can select the stocks you want or let the software automatically pick them for you depending on your data source. Add custom messages, graphics, time or date stamp, additional data, and specify how often they should appear.

The screenshot displays two overlapping windows from the Omnivex TickerDisplay 4 software. The background window shows a table of stock data with columns for ID, Symbol, Exchange, Last, Change, and Trade Volume. The foreground window, titled 'Data Sources', is a configuration table with columns for Name, Data Source Origin, Live, Status, My Symbol List Label, and Sort Field. It lists various data sources like MAIN (REUTER), EUROPEAN (BLOOMBERG), SUNDRY (ILX), EXTENDED (HYPERFEED), and Excel (EXCEL). The Excel source is currently selected, and a dropdown menu for 'Sort Field' is open, showing options like ID, Symbol, Exchange, Last, Change, and Volume.

ID	Symbol	Exchange	Last	Change	Trade Volume
0007	CNET	NYSE - New York Stock Exchange	122.16	0.16	100
0001	AL	NYSE - New York Stock Exchange	103.88	3.88	300
0004	AOL	NASDAQ	92.56	2.56	400
0008	GE	NASDAQ	160.89	0.89	200
0009	BTS	NASDAQ	77.93	-9.06	100
0010	CSKO	NASDAQ	124.92	2.92	800
0011	CA	NASDAQ	125.65	3.65	300

Name	Data Source Origin	Live	Status	My Symbol List Label	Sort Field
MAIN	REUTER	<input type="checkbox"/>	Not Connected	GENERAL	ID
EUROPEAN	BLOOMBERG	<input type="checkbox"/>	Not Connected	CORE	Volume
SUNDRY	ILX	<input checked="" type="checkbox"/>	Connected	SUNDRY	Symbol
EXTENDED	HYPERFEED	<input checked="" type="checkbox"/>	Connected	EXTENDED	Last
Excel	EXCEL	<input checked="" type="checkbox"/>	Connected		ID

Create multiple messages and ticker feed layouts and schedule them to be automatically displayed at preset times in a familiar graphical calendar format. Multiple data vendors are supported and feeds are fully configurable.

## General Specifications

Manage Multiple Board Types	<ul style="list-style-type: none"> <li>Define and simultaneously drive multiple boards and board types</li> <li>Configure scrolling speed individually on supported hardware</li> <li>Display information in various modes to control how data appears</li> <li>Supports serial and TCP/IP connectivity</li> <li>Send data/stocks by cycle, combined or pipe mode</li> </ul>
Customize Data from Multiple Sources	<ul style="list-style-type: none"> <li>Define multiple data feeds</li> <li>Sort by any field to indicate the order of appearance on your ticker</li> <li>Data feeds are fully configurable</li> <li>Schedule "top ten" type lists for supported vendors</li> </ul>
Create Customized Messages	<ul style="list-style-type: none"> <li>Combine messages with external data</li> <li>Full text formatting (font, size, and style)</li> <li>Create any number of custom messages</li> <li>Full time and date display formatting</li> <li>Include date, time, pictures, text, foreign symbols and additional data such as indices and news headlines</li> </ul>
Format Stock Quote Appearance	<ul style="list-style-type: none"> <li>Supports automatic color change on values</li> <li>Provides predefined templates</li> <li>Supports display of Kanji names</li> <li>Allows filtering on volume</li> <li>Automatically formats stock quotes</li> <li>Optional use of data vendor formatting</li> <li>Select items to display (symbol, company name, etc.)</li> </ul>
Customize Your Data Sources	<ul style="list-style-type: none"> <li>Includes interfaces to all major data vendors</li> <li>Easily add support for other DDE data sources</li> <li>Quickly add extra field definitions to access any portion of the data stream</li> <li>Interface available to Internet data feed</li> <li>Built-in support for Excel spreadsheets</li> </ul>
Powerful Scheduling Capabilities	<ul style="list-style-type: none"> <li>Create multiple schedules</li> <li>View events in familiar calendar format</li> <li>Each day of the week can be uniquely defined</li> <li>Adjustable time scale to zoom in on detailed schedules</li> <li>Spot messages can be inserted to interrupt regular programming</li> <li>Multiple layouts, messages, schedules and devices can be defined</li> </ul>
